Once again I am shocked and disgusted to read of the fraud that has been going on, and still continues to this day, in CFTC. I received this update from Bill Weir and I am just sitting here shaking my head wondering how our officals that were placed in charge of protecting consumers from the actions of large institutions could conduct their day to day duties knowing that their actions were fraudulent. I can only imagine what personal guarantees they must have been given by highly placed staff to convince them to become criminals.

I think it is time for action on your part to clean up this RAT's nest. The guilty must be punished and a new set of people must be placed in a position to clean up this mess.

If it was up to me I would sentence all concerned to life in prison with no hope for parole. This farce has gone on long enough. It is your duty to end this manipulation and fraudulent activity,

I have enclosed a copy of Bill's email to me. I hope a groundswell will occur to force you to take the action you know is required.

RE: CFTC CONSPIRACY WHISTLE BLOWER

CFTC Commissioners:

For years I have been writing your organization and protesting the obvious manipulation of both gold and silver on the COMEX. Time and time again you stated and/or implied that I didn't know what I was talking about and I was just another "conspiracy nut". I finally came to the conclusion that your organization was either Incompetent or Corrupt but I had always given you the benefit of the doubt and settled on incompetence.

NEW DEVELOPMENTS IN THE CFTC SCANDAL:

On September 17, 2010, CFTC Administrative Law Judge, George H Painter, issued a "Notice and Order" announcing his retirement from his position. In this notice Judge Painter wrote of a conspiracy at the highest levels of the CFTC (within the ENFORCEMENT DIVISION) where a long time judge of 20 years has been conspiring with past CFTC Chairs to RIG THE ENFORCEMENT OF THE LAW by NOT finding ANYONE guilty of market manipulation. Here are Judge Painter's own words:

"There are two administrative law judges at the Commodity Futures Trading Commission: myself and the Honorable Bruce Levine. On Judge Levine's first week on the job, nearly twenty years ago, he came into my office and stated that he had promised Wendy Gramm, then Chairwoman of the Commission, that we would never rule in a complainant's favor. A review of his rulings will confirm that he has fulfilled his vow. Judge Levine, in the cynical guise of enforcing the rules, forces pro se complaints to run a hostile procedural gauntlet until they lose hope, and either withdraw their complaint or settle for a pittance, regardless of the merits of the case"

A copy of Judge Painter's letter can be found below with a stamp proving that it was received and filed by the CFTC on October 13, 2010.

Needless to say I was shocked at this revelation even though I knew it was always

one of either two choices: Incompetent or Corrupt. Here we have not ONE but THREE senior people at the CFTC who had knowledge of a gigantic miscarriage of justice and cover-up that is still going on. Although Judge Painter should be commended for blowing the whistle WHAT TOOK HIM SO LONG?! I am truly disgusted at the corruption at the heart of the CFTC. Judge Levine should be tried for TREASON for his involvement in this scandal.

I DEMAND a full investigation into the allegations and complete disclosure of ALL PARTIES involved. I also DEMAND that you STOP delaying the Silver Investigation that has been hung up in the ENFORCEMENT DIVISION for for two years now!

We have waited far too long for justice.

It is high time that HEADS ROLL AT THE CFTC!

I await an immediate reply to this letter.
